Notes:

The presentation of this table differ from that of the similar tables published by CAS in the volume n°5 of "Etudes statistiques" series entitled « l'Etat des comptes économiques 1994-1995 » in two points:

- a) non-market services are incorporated in the table (branch 15: General Government)
- b) slaughtering products (fresh meat,) are part of the branch 4 - Food industries and not of the branch 2 - livestock products.

Moreover, as this table was compiled with new statistical sources, the 1997 figures are not directly comparable with those published for 1994 and 1995 in the quoted volume.

Notice: Because of round-offs, certain totals of the table can differ from one another by one unit.
